

SPREADING AUTOMATION

Balenz Spreading Automation eliminates the process of manually entering financial statements into credit risk analysis software. Our product improves spreading consistency and significantly enhances analyst productivity.

Balenz Spreading Automation delivers significant value to our clients via:

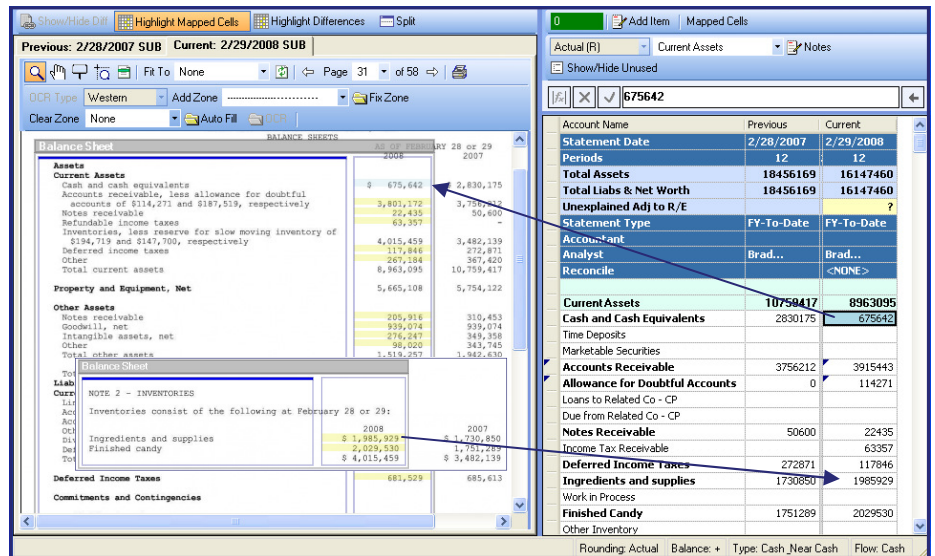

- Reduced errors in the financial statement spreading process
- Monitoring of the receipt and spreading of financial statements
- Internal and external e-mail alerts for reminders and overdue notices
- An electronic data repository of all source documents
- Integration with an institution's existing financial statement spreading software

Spreading Automation loads financial data into spreading systems from:

- Electronic files
- Faxes
- Scanned documents

For companies with:

- Publicly available data
 - ✓ SEC filings
 - ✓ EDGAR Online
 - ✓ Annual and Quarterly Reports
 - ✓ 3rd party data providers
- Private company data
 - ✓ Company prepared
 - ✓ Audited statements
 - ✓ Exports from general ledger software

Documents can be submitted to Spreading Automation via:

- Secure website
- E-mail
- Fax server
- Optical scanner
- Connection to 3rd party data providers
